Summary

Final-year Artificial Intelligence student at the National Higher School of Artificial Intelligence (ENSIA), with hands-on experience in machine learning, deep learning, NLP, computer vision, and full-stack development. Co-founder of an AI startup and demonstrated track record in competitive hackathons. Seeking to apply advanced AI skills in an engineering or research role.

Education

National Higher School of Artificial Intelligence (ENSIA) Algiers, Algeria
Engineer's Degree in Artificial Intelligence 2022 – Present (5th year)

Experience

Co-founder & AI Developer 2025 – Present
Sihati Startup Algeria

- Co-founding and actively developing an AI-powered healthcare startup, contributing to product architecture, machine learning features, and software development.

Artificial Intelligence and Data Science (Internship) September 2025
ASAL – Algerian Space Agency Algeria

- Completed a one-month internship contributing to internal web development projects within the national space agency's technical teams.

Front-end & Back-end Developer 2024
Thynctech Company – AllMall Website Algeria

- Developed a responsive e-commerce platform in a cross-functional team using React (frontend) and Laravel (backend), delivering a scalable and user-friendly solution.

Hackathons & Awards

1st Place – CodeLemma Hackathon 2025
National Higher School of Mathematics

Won first place in a hackathon focused on game theory, developing an AI-based solution to model and solve game-theoretic problems.

2nd Place – Finovia AI Cup 2025
École Nationale Supérieure de Management (ENSManagement), Koléa

Developed *Transaction Guard*, an AI-powered fraud detection system for financial transactions, placing second among competing teams.

Projects

Algerian Law RAG System 2025
Python, LangChain, RAG, NLP, Arabic/French NLP

- Built a bilingual (Arabic/French) Retrieval-Augmented Generation system for Algerian legal documents, featuring advanced semantic search, user authentication, and a real-time chat interface.

RL Maze & Path-Finding Visual Simulator 2025
Python, Q-Learning, SARSA, Reinforcement Learning

- Designed an interactive simulator that trains Q-Learning and SARSA agents on procedurally generated mazes, with real-time visualisation, side-by-side agent comparison, training curves, and GIF export.

Document Management System (DMS)

2025

React, Node.js, PostgreSQL, MongoDB, Redis

- Built a full-stack enterprise DMS with role-based access control, department-scoped document visibility, AI-powered title translation, real-time monitoring, and an event-driven microservices architecture.

Online Voting System

2024

React, Node.js, PostgreSQL

- Built a secure web platform for digital elections ensuring transparency, data integrity, and accessibility for voters.

Wassal – Load Transporting Mobile App

2024

Flutter, Firebase

- Developed a mobile application enabling safe and affordable transportation of heavy loads across Algeria, connecting drivers and clients in real time.

Book Recommendation System

2024

Python, Scikit-learn

- Implemented a recommendation engine using clustering and association rule mining to suggest books based on user reading patterns.

Supply Chain & Logistics Optimisation

2023

Python, A, Hill Climbing, Uninformed Search*

- Developed an AI-driven solution to optimise agricultural product transport routes across Algeria using uninformed search, A*, and hill climbing strategies.

Skills

AI / ML	Machine Learning, Deep Learning, Reinforcement Learning (Q-Learning, SARSA), NLP, Computer Vision (OpenCV), RAG systems, Scikit-learn, NumPy, Pandas
Languages	Python, C++, JavaScript
Web	React, Node.js, Laravel, HTML/CSS, SQL, PostgreSQL, MongoDB, Redis, Firebase
Mobile	Flutter
Tools	Git, GitHub, Agile (Jira, Asana), Linux
Human Languages	Arabic (Native), English (Good working Proficiency), French (Basic)
