

AMIRA MEREDDEF

PROFILE

An Artificial Intelligence student aspiring to become an AI Engineer. Passionate about Machine Learning, Deep Learning, and creative technologies that mimic human intelligence. I actively work on diverse projects, from developing ML models to web applications and innovative solutions that challenge and expand my technical skills.

EDUCATION

2022 - Present

National Higher School of Artificial Intelligence (ENSIA), Algiers, Algeria

SKILLS

- **Programming Languages:** Python, C++, JavaScript, R.
- **Mobile Development:** Flutter and basic understanding of Kotlin.
- **Web Development:** React, HTML, CSS, JS, SQL and database management.
- **Machine Learning & Data Science:** Data preprocessing, model training, analysis using Python (NumPy, Pandas, Scikit-learn)
- **Networking & Security:** Basic understanding of networking protocols and security principles.
- **Software Engineering Tools:** Git, GitHub, Agile methodologies (Asana, Jira)
- **Languages:** Arabic (Native), English (Fluent), French (Basic)
- **Soft Skills :** Hardworking, Time Management, Teamwork.

PROJECTS

2023

DZSERVE

Developed a website connecting job seekers with clients needing services (using HTML , CSS, JS and PHP).

2023

ELECTRICITY NETWORK MANAGEMENT SYSTEM – DATA STRUCTURES & ALGORITHMS

implemented a simulation system for the national electricity company to manage energy consumption and production by households.

2023

SUPPLY CHAIN & LOGISTICS OPTIMIZATION – INTRODUCTION TO AI

Developed an AI-driven solution for optimizing agricultural product transport across Algeria using strategies (Uninformed, A*, Hill Climbing).

2024

BOOK RECOMMENDATION SYSTEM

Created a recommendation system for books using clustering and association rules (Python).

2024

ONLINE VOTING SYSTEM

Developed a secure web platform for conducting digital elections, ensuring transparency and accessibility.

React (frontend), Node.js (backend), PostgreSQL (database)

2024

LOAD TRANSPORTING APP – "WASSAL"

Developed a mobile app for safe and affordable transportation of heavy loads across Algeria. Used Flutter for frontend and Firebase for backend services.

2025

TIME SERIES FORECASTING – AIR PASSENGER DATA

Developed a time series forecasting model to predict air passenger trends using machine learning techniques. Applied data preprocessing, visualization, and statistical modeling to analyze patterns and improve prediction accuracy.

EXPERIENCE

AllMall Website – Thynctech Company

- Developed a responsive e-commerce website for Thynctech, contributing to both front-end and back-end development.
- ✓ Worked collaboratively with a team, applying modern web technologies to create a scalable and user-friendly platform. (React and laravel).

Mathurance Hackathon

- Participated in the Mathurance Hackathon, tackling real-world financial and mathematical challenges using AI and data science techniques.
- ✓ Developed predictive models and analytical tools to solve complex problems, leveraging machine learning algorithms and statistical methods.
